Lakehead Constructors, Inc. is seeking an experienced Project Manager to join our team, focused on industrial construction and maintenance with an emphasis on mining maintenance in Marquette, MI. This position is responsible for managing and executing all assigned construction projects. The Project Manager also acts as the primary client point-of-contact for customer relations and marketing. The ideal candidate will be self-driven and strive for continuous improvement in a complex and dynamic work environment.

Required skills include, but are not limited to:

- Project Management Skills
  - Coordinate workflow and effectively communicate to project staff members on project details and status
  - Develop and maintain a positive and collaborative relationship with the engineering / architect team assigned to the project and establish proper flow of communication / documents between parties, including purchase orders, RFI's, change orders and project meeting minutes
  - Effectively communicate with Field Supervision and Project Engineers to ensure that current plans and specifications are used, required materials and equipment are on-site, and ensure compliance with client and Company
  - Utilize appropriate safety processes and controls and ensure they are properly communicated and implement in accordance with QA / QC standards, and ensure appropriate ISO 9001 procedures are implemented
  - Manage subcontractor selection and monitor performance
  - Provide leadership, coaching and mentoring to ensure positive team atmosphere; take corrective action / provide feedback as needed
  
- Project Financial Oversight and Responsibility
  - Work with the estimating department to develop estimates and bid projects

- Develop project budget and ensure it is entered accurately into Construction ERP software (Vista Viewpoint)
  - Complete risk assessment and analysis of deviations throughout duration of project
  - Review and approve all project subcontracts, purchases, timesheets and expense reports, and ensure timely completion of A/P unapproved invoices
  - Ensure timely billing of customer invoices and follow up on collections when required
  - Monitor and control project costs and report to Vice President of Construction on status
  - Assemble and review final project unit costs to be used for reference for future bids
  - Complete project close-out meeting
- Customer Relationship Management
    - Maintain regular communication with customer; effectively communicate customer expectations to project team and Construction leadership
    - Follow up with owner after project completion to ensure customer satisfaction
- Complete required reports and paperwork in a timely manner utilizing construction ERP software
  - Ensure project schedule is established, maintained and communicated with appropriate parties
  - At close of project, oversee preparation of final project punch list for owner's review
  - Maintain a clean, neat and safe work area for all project team members
  - Lead by example on all safety processes and procedures

**Qualifications:**

**Education and / or Experience**

Undergraduate degree in Engineering or Construction Management preferred

5+ years of experience managing mining or heavy industrial repairs/projects, understands union contracts and manages work accordingly

Any equivalent combination of education and / or experience will be considered
